EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Santarelli, registration number 37560 on 7/20/2006.

The application has been amended as follows:

Claim 23, line 2, inserted --linear-- before "slot".

2. The following is an examiner's statement of reasons for allowance: the addition of the term "slot" to claim 23 is to further define the claim over those references that use helical slots, i.e., a threaded hole, with a threaded bolt, as shown in the DiMarco patent 6654253. Also, although the preambles in most of the claims are directed to a "latch", the body of the claims are clearly directed to a combination including a latch, a subassembly with a connector, and a chassis with a connector. Therefore, the claims have been interpreted to be combination claims when reviewing the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
